

Lead Developer - PowerPlatform

Job Description

Job Title: Head of Development

Start date: ASAP

Rate (all inclusive): £ 65,000 -£70,000

Contract / Permanent: Permanent

Location: Cardiff/Remote

Role overview: RedCortex have an excellent reputation for delivering leading edge Office 365 based solutions to our customers. You will be responsible for leading RedCortex' PowerPlatform practice, ensuring that the Team members you are responsible for are producing high quality work for our customers, as well as delivering high quality work yourself. You will be expected to occasionally contribute to bid writing and will also be producing proposals for customers, so excellent verbal and written communication skills are required. The successful Head of PowerPlatform will be responsible for the day to day operations of the PowerPlatform Team, as well as having a strategic view of how the practice should grow and expand to provide more services.

- Key responsibilities:**
- Ensure high quality deliverables of the PowerPlatform Team,
 - Create best practice guidance on Development of all PowerPlatform functions,
 - Good knowledge of Power BI,
 - Produce high quality proposals as required,
 - Deliver leading edge PowerPlatform consultancy and delivery to our customers,
 - Contribute to bid documentation as required,
 - Act as SME and point of responsibility for all PowerPlatform Work,
 - Provide technical and operational support,
 - Delegates work to PowerPlatform Team,
 - Monitors billable utilisation of the team.

- Skills and qualifications:**
- Minimum of 2 years managing Office365 PowerPlatform solutions,
 - Excellent knowledge and experience of PowerPlatform Online and on-premises (2010 – 2019),
 - Strong knowledge and experience of Office 365,
 - Experience of the Power Platform (PowerApps, Automate, BI),
 - Experience with Teams, One Drive and Azure,
 - Good working knowledge of SharePoint,

- Proficiency in the use of scripting and automation tools,
- Strong problem-solving and analytical skills,
- Knowledge of best practices for maintaining information security,
- Ability to handle confidential and sensitive company information responsibly,
- Ability to think creatively to devise customizations and uses for PowerPlatform,
- Strong leadership skills,
- Clear and effective communication,
- Ability to translate technical jargon into layman's terms for explanatory purposes,
- Manages time efficiently and multi-tasks effectively.
